

# Grade K

## Properties Matter

Young children are naturally curious and want to observe, explore, and compare a variety of objects and events in their daily lives. During this series of learning experiences, students observe and explore the properties of matter using their own senses as tools. Students also explore other properties of objects and matter, including pitch of sound, color, geometric shape, smell, and texture as they make concrete comparative measurements in length, mass, capacity, and temperature of objects.

Kindergarten children will also enjoy the heartwarming story of how a girl named Emily Elizabeth became the owner of a very large red dog named Clifford. Students will observe the changes in Clifford and his belongings as he grows by making comparisons of length, mass, and capacity.

## Table of Contents

	page
♦ <b>Interdisciplinary Connections</b> Language Arts, Mathematics, Social Studies, Art, Music, Physical Education	<b>1</b>
♦ <b>Overview of Learning Experiences</b> Targeted Science TEKS, Engage, Explore, Explain, Elaborate, Evaluate	<b>2</b>
♦ <b>Engage</b> Students use their five senses to observe and compare objects.	<b>3</b>
♦ <b>Explore</b> Students use senses to observe length, capacity, mass, and temperature.	<b>15</b>
♦ <b>Explain</b> Students communicate their findings from the explore activity, discuss making comparisons of length, capacity, mass, and temperature	<b>16</b>
♦ <b>Elaborate</b> Students explore the changes in Clifford and his belongings as he grows from a tiny puppy into a very large red dog.	<b>26</b>
♦ <b>Evaluate</b> Students demonstrate their understanding of the five senses, tools, measurement and matter through drawings and selected response items.	<b>33</b>
♦ <b>Materials Details Sheet</b> List and description of items required for each section of the learning experience	<b>38</b>
♦ <b>Background Information for Teachers</b> General summary of content information for teachers	<b>42</b>
♦ <b>Content Area TEKS</b> Texas Essential Knowledge and Skills statements for each of the content areas addressed in this learning experience	<b>43</b>
♦ <b>Reading Connections</b> List of suggested books and stories for students about senses and comparing change	<b>49</b>
♦ <b>References</b> List of books, articles, and websites used by developers of these learning experiences	<b>50</b>
♦ <b>Master Copies</b> Student sheets and other materials to be copied by teacher when using these learning experiences in the classroom	<b>A-Q</b>
